Triple test, adrift: On the ruling on definition of 'industry'

The Supreme Court's decision on industrial disputes risks undermining crucial labour protections and legislative intent.

August 24, 2026 | 3 min read

Daily Editorial Reader

On August 20, a nine-judge Bench of the Supreme Court of India delivered a judgment on the correctness of the ruling in Bangalore Water Supply and Sewerage Board vs A. Rajappa (BWSSB) (1978). In that judgment, Justice V.R. Krishna Iyer had **laid down**¹ what was called the "Triple Test" on what counts as an "industry" under Section 2(j) of the Industrial Disputes (ID) Act, 1947 (ID Act). Three conditions were to be met for an industry — a systematic activity, employer-employee cooperation, and production/distribution of goods and services to satisfy human wants other than those that are purely religious or spiritual. **Profit motive**² was **irrelevant**³; what mattered in this determination was the nature of the activity, and only "sovereign functions" stood outside it. A five-judge Bench in State of U.P. vs Jai Bir Singh (2005) raised a doubt about this definition and a seven-judge Bench sent it to the current nine-judge Bench. This Bench, led by Chief Justice of India Surya Kant, left the Triple Test standing for all pending disputes under the older ID Act, which was **repealed**⁴ on November 21, 2025 when the Industrial Relations Code, 2020 (IRC) **came into force**⁵. However, a majority of the nine-judge Bench also ruled that BWSSB will not be a "**sheet anchor**"⁶ for interpreting Section 2(p) of the IRC. That is a mistake. In her **dissenting opinion**⁷, Justice B.V. Nagarathna held that the reference itself was unnecessary and that the Triple Test requires no interference — a view shared by three other judges. Her reasoning is **compelling**⁸. Since 1978, and particularly after the **liberalisation**⁹ and privatisation reforms of 1991, a far higher number of workers have moved to the private sector, out of the security of public employment. An **expansive**¹⁰ definition of industry, as **entailed in**¹¹ the Triple Test, is therefore even more necessary now as a **bulwark**¹² for the worker.

Yet, Section 2(p) of the IRC does not **move away from**¹³ Justice Krishna Iyer's Triple Test formula in BWSSB and reproduces much of its essence. It is therefore difficult to understand why BWSSB has to be **set aside**¹⁴ when Section 2(p) itself comes up for interpretation. The Triple Test was also not merely a pro-labour device. An **expansive**¹⁰ definition of industry brought with it not just the ID Act's protections but also its restrictions — for instance, a regulated route to **retrenchment**¹⁵ and closure for the employer, and a bar on workers striking **at will**¹⁶. **In essence**¹⁷, the Triple Test allowed for industrial peace rather than worker welfare alone. **Severing**¹⁸ that principle from the IRC, as the majority has done, **cuts away**¹⁹ the interpretive framework that allowed such disputes to be resolved. With the essence of the Triple Test carried into Section 2(p), it is now **incumbent upon**²⁰ courts and tribunals to ensure that a change of statute is not read as a change of intent even if the majority judgment has removed the anchor to do so.

EDITORIAL STANCE

Critical

(expressing sharp disagreement)

The author adopts a critical tone regarding the Supreme Court's majority ruling that disconnects the established 'Triple Test' from the new Industrial Relations Code. This perspective is taken because discarding this landmark precedent weakens key safeguards for private sector workers while disrupting a balanced mechanism for resolving workplace disputes. Ultimately, the editorial contends that judicial bodies must continue preserving the original legislative intent of industrial stability despite the court's verdict.

#	WORD & POS	MEANING (HINDI & ENGLISH)	SYNONYMS (UK)	ANTONYMS (UK)
1	Irrelevant ADJECTIVE Negative	अप्रासंगिक Not connected with or relevant to something; having no legal or contextual significance. Memory Hook: Ir-(not)+relevant — having no bearing or connection to the matter at hand.	inapplicable, extraneous, immaterial	pertinent, germane, applicable

Core concerns: On the Indian economy, the road ahead

Sluggish industrial core growth signals upcoming economic headwinds and softening domestic consumer demand.

August 24, 2026 | 2 min read

Daily Editorial Reader

The slowdown in the growth of India's core industrial sectors in July was not surprising, with other indicators predicting **easing**¹ demand conditions as well. Growth in the index of core industries (ICI) slowed to 5.4% in July from 6% in the previous month. This was **in keeping with**² the Manufacturing Purchasing Managers' Index, which in July eased to its lowest level since August 2021 due to weak domestic demand conditions. While July's growth in the ICI was the second-highest growth rate in the last seven months, the data nevertheless highlight some concerning aspects of the Indian economy. The first has to do with the fact that a large part of even this slower growth seems to be based on a statistical low **base effect**³. The coal sector, for example, grew at an 11-month high of 7.6% in July, but this was based on a contraction of 12.3% in July of last year. Similarly, the refinery products sector **snapped**⁴ a three-month streak of contraction to grow at 2.7%, but this too was based on a contraction in July 2025. The iron ore sector, however, grew at a very **robust**⁵ 29.5%, **albeit**⁶ slower than a **blistering**⁷ 44.5% in June. This seems **heartening**⁸ regardless of the contractions of 16.4% and 7.1% in June and July of last year, respectively. But the steel sector slowed **drastically**⁹ in July to 2.9% from 5.6% in June and 15.7% in July of last year.

The domestic crude oil and natural gas sectors have been lasting drags on the economy. Both have contracted continuously for at least the last 14 months for which the new series of the ICI has data. India's crude oil imports rose 13.3% in volume terms in July, while Liquefied Natural Gas (LNG) imports grew a more **marginal**¹¹ 1.5%, showing that the economy's appetite is being whetted from abroad. This **external dependence**¹³ is proving very expensive. High oil prices have meant that the crude oil import bill jumped 41% in July. The 100% tariffs that the United States is preparing to **levy on**¹⁴ countries such as India that import Russian oil will once again burden Indian exporters. Moving to 20% ethanol-blending has not yet impacted oil imports **materially**¹⁵. Within the ICI, the only two bright spots of the economy were the cement and electricity sectors. The electricity sector grew at a **robust**⁵ 9% in July, although this was slower than the two consecutive months of double-digit growth in May and June thanks to the **prevalent**¹⁷ heatwave conditions in many parts of the country. The cement sector sped up to 13.1%, a welcome acceleration. Such positive trends were **few and far between**¹⁸. Overall, the Indian economy looks to be in for a period of **slack**¹⁹ demand, higher costs, and **moderating**²⁰ growth.

EDITORIAL STANCE
Cautious
(carefully concerned)

The author adopts a cautious tone to evaluate India's recent economic performance, highlighting that headline core growth is largely inflated by a statistical base effect rather than genuine expansion. Persistent drag in domestic crude oil output combined with external tariff risks indicates a challenging road ahead. By balancing weak domestic indicators against a few temporary bright spots like cement, the editorial stresses the need to prepare for sluggish demand and higher import costs.

#	WORD & POS	MEANING (HINDI & ENGLISH)	SYNONYMS (UK)	ANTONYMS (UK)
1	Easing ADJECTIVE Neutral	धीमा पड़ता हुआ Becoming less intense, severe, or active; moderating in level or momentum. Memory Hook: Think of 'ease' — taking it easy, so activity or pressure decreases.	softening, subsiding, relaxing	intensifying, surging, escalating
2	Base effect NOUN Neutral	आधार प्रभाव The distortion in comparative growth figures caused by an unusually low or high reference point in the prior period. Memory Hook: Base = starting point. If the base was very low, even a minor rise looks like a huge percentage jump.	statistical distortion, comparative skew, reference shift	absolute growth, baseline stability, real change
3	Snapped VERB Neutral	तोड़ दिया Abruptly ended or broke a continuous run, trend, or streak. Memory Hook: Think of snapping a stick — a sudden, decisive break in a continuous line.	halted, severed, terminated	continued, prolonged, extended
4	Robust ADJECTIVE Positive	मजबूत Strong, vigorous, and healthy; showing solid economic health or growth. Memory Hook: Sounds like 'robot' — strong, sturdy, and reliable under difficult conditions.	vigorous, sturdy, flourishing	fragile, feeble, sluggish
5	Albeit CONJUNCTION Neutral	यद्यपि Though; even though (used to introduce a qualifying statement or caveat). Memory Hook: Shortened form of 'albeit' — meaning 'even though it be so'.	although, even if, notwithstanding	furthermore, consequently, moreover
6	Blistering ADJECTIVE Positive	तेज़ तर्रार Extremely fast, intense, or energetic in rate, force, or pace. Memory Hook: Running so fast that friction causes blisters on your feet — blistering speed.	breakneck, dazzling, rapid	sluggish, plodding, tardy
7	Heartening ADJECTIVE Positive	आशाजनक Inspiring hope, cheerfulness, or renewed confidence. Memory Hook: Giving warmth or cheer to your 'heart', filling you with hope.	cheering, reassuring, promising	disheartening, dismal, depressing
8	Drastically ADVERB Negative	भीषण रूप से In an extreme, severe, or strikingly sudden manner. Memory Hook: Sounds like 'drastic' action — sharp, severe, and sudden.	sharply, substantially, steeply	marginally, gradually, subtly
9	Marginal ADJECTIVE Neutral	मामूली Small, limited, or minor in extent, degree, or overall significance. Memory Hook: Notes written in the 'margin' of a book — small and secondary to the main text.	negligible, slight, incremental	substantial, significant, considerable
10	Materially ADVERB Neutral	काफी हद तक To a substantial, important, or noticeable degree; significantly. Memory Hook: Material = physical substance; acting materially means making a real, tangible impact.	substantially, significantly, appreciably	immaterially, trivially, insignificantly
11	Prevalent ADJECTIVE Neutral	प्रचलित / व्यापक Widespread, common, or generally present in a particular place at a given time. Memory Hook: Prevail = to win over or dominate; prevalent means dominating a region or time.	widespread, pervasive, predominant	rare, uncommon, isolated
12	Slack ADJECTIVE Negative	सुस्त / मंद Characterised by a lack of business activity, demand, or movement; sluggish. Memory Hook: A slack rope has no tension or action; slack demand means a quiet, inactive market.	sluggish, depressed, inactive	brisk, buoyant, vigorous
13	Moderating VERB Neutral	धीमा होना Becoming less intense, extreme, rapid, or rigorous; decelerating. Memory Hook: Shifting from high speed to a 'moderate' speed — reducing intensity.	decelerating, easing, tempering	accelerating, intensifying, surging

FIXED PREPOSITIONS
Levy **on** (कर लगाना): To officially impose or collect a tax, duty, or tariff upon a target entity or commodity.

PHRASAL VERBS
Drag **on** (बोझ बनना): To act as a persistent handicap, weight, or slowing influence upon something.

ONE-WORD SUBSTITUTIONS
External dependence (बाहरी निर्भरता): Over-reliance on foreign nations or outside entities for critical resources or economic needs.

IDIOMS & PHRASES
In keeping with (के अनुरूप): In conformity, agreement, or harmony with a prevailing trend or standard.
Whet the appetite (इच्छा को बढ़ाना): To sharpen, excite, or increase someone's desire or demand for something.
Bright spot (उम्मीद की किरण): A positive, successful, or hopeful feature in a generally difficult or disappointing situation.
Few and far between (दुर्लभ / किरला): Not happening often; scarce, rare, or widely spaced out in frequency.

To build Delhi's future, learn from past missteps

Delhi's latest Master Plan must overcome bureaucratic inertia and agency fragmentation to succeed.

17 August 24, 2026 | 02 min read

Daily Editorial Reader

About 25 years ago, when Delhi's third Master Plan came into effect, the city's population was about 14 million, Gurugram and Noida were **fledgling**² suburbs, the first lines of the capital's Metro network were being laid, and a CNG policy for public transport had been introduced as a pollution-control measure. Since then, another 10 million people have made the capital their home, civic infrastructure of its neighbouring cities has come under **acute**³ stress, and the improvement in air quality that Delhi experienced for much of the 2000s and early 2010s has given way to an almost **intractable**⁵ pollution crisis. Delhi's fourth Master Plan, notified last week, acknowledges these challenges. Its emphasis on expanding public transport, ecological **restoration**⁶, redevelopment, affordable housing and mixed land use is welcome.

One of the plan's strengths is its recognition that Delhi cannot be built simply by expanding outward. With limited land available within the National Capital Territory, better **utilisation**⁷ of existing urban land will become more important. The proposed increase in housing supply, including an ambition of roughly 40 lakh additional homes by 2047 at affordable rates, and greater flexibility in development norms to permit higher densities is, therefore, significant. The plan also recognises the **futility**⁸ of rigidly **demarcating**⁹ residential and commercial areas. If implemented well, these measures could ease the city's longstanding traffic congestion and improve air quality. Mixed land use, environment-friendly transport, the redevelopment and **nurturing**¹⁰ of green spaces, and greater attention to the city's water bodies could all **contribute to**¹¹ improving Delhi's ecological health and enhance the well-being of its residents.

None of these ideas will succeed, however, without confronting the national capital's most persistent governance problems: Municipal **inertia**¹² and a lack of **alignment**¹³ among civic agencies, Centre and Delhi government. These deficits were the biggest **bottleneck**¹⁴ in realising the previous Master Plan's vision of a more sustainable city. Over the past 25 years, research on pollution, Yamuna **restoration**⁶, waste management, urban flooding and transport development has pointed to the need for **concerted**¹⁵ action among departments. Metro expansion, for instance, works best when bus routes, **last-mile connectivity**¹⁶, parking rules and pedestrian facilities are designed around it. Land-use planning and infrastructure development cannot be **divorced from**¹⁷ the requirements of **curbing**¹⁸ water logging, while building approvals, fire safety and emergency response require effective information-sharing among construction, fire and municipal authorities. Repeated fire incidents, building collapses and the strain placed on the city's infrastructure during heavy rainfall have exposed the risks of **fragmented**²⁰ and overlapping responsibilities among its agencies. Delhi has a **blueprint**²¹ for improving **liveability**²². It needs to learn from past failures.

EDITORIAL STANCE
Pragmatic
(practical and realistic)

The author adopts a pragmatic tone to evaluate Delhi's new Master Plan, welcoming its forward-looking urban and ecological vision while highlighting chronic institutional bottlenecks. The editorial contends that comprehensive urban plans inevitably fail without synchronized governance between municipal, state, and central bodies. It concludes by stressing that the capital must actively learn from past implementation deficits to build a sustainable, liveable future.

#	WORD & POS	MEANING (HINDI & ENGLISH)	SYNONYMS (UK)	ANTONYMS (UK)
1	Acute ADJECTIVE Negative	गंभीर या तीव्र Presenting or experienced to a severe, intense, or critical degree.	severe, intense, grave	mild, slight, moderate
Memory Hook: Acute sounds like 'a cute' needle prick—sharp, piercing, and intensely felt.				
2	Intractable ADJECTIVE Negative	असाध्य या अनसुलझा Extremely hard to manage, control, cure, or resolve.	unmanageable, incorrigible, unyielding	tractable, manageable, amenable
Memory Hook: In-(not) + tractable(track/steer) = a problem that cannot be tracked, steered, or handled.				
3	Utilisation NOUN Neutral	उपयोग The action of making practical, effective use of available resources.	employment, exploitation, application	wastage, disuse, underutilisation
Memory Hook: Connected to 'utility' — turning available resources into practical utility.				
4	Demarcating VERB Neutral	सीमांकन करना Setting or clearly showing the limits, boundaries, or separation between distinct zones.	delineating, delimiting, bounding	blurring, confounding, integrating
Memory Hook: De-mark = setting clear visual marks for boundaries.				
5	Nurturing VERB Positive	संवर्धन या पोषण करना Caring for, supporting, and actively encouraging the growth or development of something.	fostering, cultivating, cherishing	neglecting, stifling, hindering
Memory Hook: Like 'nutrition' feeds the body, nurturing feeds growth and survival.				
6	Alignment NOUN Positive	तालमेल या संरेखन Arrangement in a straight line, or a state of close agreement and shared policy between groups.	coordination, synchronisation, congruence	divergence, misalignment, discord
Memory Hook: Bringing separate entities onto the same 'line' of policy and purpose.				
7	Concerted ADJECTIVE Positive	संयुक्त या समन्वित Jointly planned, arranged, or carried out with coordinated effort.	collaborative, co-ordinated, joint	disjointed, unilateral, fragmentary
Memory Hook: Like a musical 'concert' where musicians play in unified, coordinated harmony.				
8	Curbing VERB Positive	रोकथाम या नियंत्रण करना Restraining, checking, or holding back an undesirable phenomenon.	restraining, suppressing, reining in	unleashing, encouraging, fostering
Memory Hook: The 'curb' of a road keeps vehicles from sliding off; curbing restrains excesses.				
9	Fragmented ADJECTIVE Negative	खंडित या बिखरा हुआ Disorganized and broken into separate, uncoordinated parts.	disjointed, splintered, compartmentalised	unified, consolidated, integrated
Memory Hook: Broken into separate, fragile 'fragments' instead of working as a solid whole.				
10	Liveability NOUN Positive	रहने की अनुकूलता The degree to which an urban environment is suitable, safe, and comfortable for human habitation.	habitability, comfort, sustainability	uninhabitability, squalor, inhospitableness
Memory Hook: Live + ability = the capacity of an urban space to support high-quality human living.				

FIXED PREPOSITIONS

Contribute to (में योगदान देना): To help bring about, cause, or advance a specific outcome or condition.

Divorced from (से पूरी तरह अलग या विमुख): Completely separated, disconnected, or isolated from something.

Strain on (पर भारी दबाव या तनाव): Severe pressure, demand, or tension exerted upon an existing resource or system.

ONE-WORD SUBSTITUTIONS

Fledgling (नया और अनुभवहीन): An entity, settlement, or enterprise that is young, newly developed, and inexperienced.

Restoration (पुनर्स्थापना): The action of returning something to a former, healthy, or unimpaired condition.

Futility (निरर्थकता): The quality of being completely pointless or incapable of producing any useful result.

Inertia (जड़ता या अकर्मण्यता): A tendency to do nothing or to remain unchanged; sluggishness in administrative action.

Bottleneck (अवरोध या अड़चन): A point of congestion, constriction, or blockage that severely impedes progress.

Blueprint (विस्तृत रूपरेखा या योजना): A comprehensive design, technical drawing, or systematic roadmap for future execution.

PHRASAL VERBS

Come into effect (लागू होना): To begin to apply or take official legal force.

Give way to (का स्थान किसी और चीज़ द्वारा ले लिया जाना): To be replaced, superseded, or followed by something else.

IDIOMS & PHRASES

Last-mile connectivity (अंतिम छोर तक संपर्क सुविधा): The final stage of a transit network delivering passengers directly to their ultimate destinations.
